---

Elizabeth Hanke is a Vice President at The Kenesis Group, LLC specializing in complex insurance allocation modeling and policy analysis and valuation.

#### Experience

Ms. Hanke is an expert in the field of allocations using relational database technology integrated with code. She has over 10 years of experience in creating computer-based allocation models, wrote the Kenesis Allocation and Billing System, and is the person primarily in charge of maintaining and customizing the code for each client. Her allocation models have been used in recovering in excess of \$1 billion in settlements on behalf of policyholders.

Ms. Hanke has a unique combination of insurance-related skills and expert knowledge of computer-based databases. She has used this combination to create large databases to track policy and claimant information, to model claims for a variety of long-tail liabilities, and to create systems to monitor and maintain data integrity.

Ms. Hanke has extensive policy experience, including knowledge of several types of policies. Ms. Hanke analyzes, interprets and quantifies the policies, aiding cost recovery projects on behalf of her clients. She has been involved in insurance recovery projects in the litigation and settlement contexts in connection with asbestos, environmental and non-asbestos products liability.

Prior to joining Kenesis, Ms. Hanke operated her own business, DataWise, Inc., where she created, used and licensed her allocation software, E-Allocation. Previously, she worked as an Economist at Swidler Berlin Shereff Friedman, LLP in the insurance litigation group and as an Economic Analyst for Howrey Simon Arnold & White, LLP.

#### Education

1996 – M.S., Economics, Arizona State University

1991 –B.A., Economic Theory, Minor in Computer Science, The American University
